

Nayan Kishor Dahare

✉ nayandahare02@gmail.com ☎ 9359781096 📍 Pune, India

Profile

Java Full Stack Developer (Fresher) with strong foundations in Core Java, OOPs, and Spring Boot, along with hands-on experience building REST APIs and full-stack web applications using React.js. Experienced in integrating databases like MySQL and developing real-world projects including AI-powered tools and browser extensions. Focused on writing clean, scalable code and building production-ready applications.

Education

B.Tech -Information Technology,
Rashtrasant Tukadoji Maharaj Nagpur University
08/2020 – 05/2024 | Nagpur
CGPA : 7

Projects

Context-Aware Email Assistant (Gmail Extension with AI Backend),

Tech: Java, Spring Boot, REST APIs, JavaScript, Gemini API

- Developed a Gmail Chrome Extension for AI-powered, context-aware email reply generation.
- Built Spring Boot REST APIs with WebClient integration for automated response generation.
- Implemented dynamic UI injection and secure API key management using MutationObserver and environment variables.

FIXORA – Local Service Marketplace Platform,

Tech Stack: Java, Spring Boot, MySQL, Thymeleaf, React.js

- Developed a role-based service platform with User, Partner, and Admin modules using React and Spring Boot.
- Implemented end-to-end booking management, including time-slot scheduling, service requests, and real-time status tracking.
- Built an admin-driven partner approval workflow and integrated backend services to streamline platform operations.

Vahdam Stores (Vahdam / Vahdam India / Vahdam Global),

Tech Stack: Shopify liquid, HTML, CSS, JS

- Customized and updated Shopify themes across multiple international stores.
- Collaborated with team members to maintain performance and improve user experience.
- Implemented UI enhancements, fixed theme issues, and ensured consistency across regional storefronts.
